Anthropology of Space and Place: Locating Culture | Wiley
L ike artists and writers of science fiction, anthropologists and other scientists studying space are thinking about life on Earth while imagining possible futures here and elsewhere. Today private corporations and national space agencies, from the U.S., Canada, and Europe to India and Indonesia, are all going into space.

What Does the Anthropology of Space Look Like?
At first sight, anthropology and space exploration may seem to be two completely different fields with nothing or very little in common. When one thinks about space exploration, the most common associations are with disciplines such as engineering, physics, medicine, robotics, IT, and others related to the technology required for the endeavour and for keeping humans alive.

[PDF] The anthropology of space and place : locating ...
At the core of my anthropology research is an interdisciplinary analysis of space, place and the cultural landscape in India, South Asia. I question how people decorate domestic spaces in relation to vernacular architecture in South India, (anthropology of architecture) , or those contradictory in-between spaces, whether rural or urban markets to domestic thresholds (boundaries, marginal, liminal and contested spaces).

Anthropology of Space | Talking Streets
We will question conventional ideas of space and place, drawing on a range of anthropological perspectives. This introductory course in the anthropology of space is interdisciplinary and ranges beyond Social Anthropology to include theoretical aspects of cultural geography, psychology, philosophy, art, architectural history and interior design.

Anthropology of Social Spaces and the Built Environment ...
The study of space and place as distinct dimensions of culture apart from ethnographic accounts has since the 1990s spawned a number of areas of anthropological research. Space is often defined by an abstract scientific, mathematical, or measurable conception while place refers to the elaborated cultural meanings people invest in or attach to a specific site or locale.

Space and Place - Anthropology - Oxford Bibliographies
The boundaries of the scope of anthropology are thus coterminous with the boundaries of the genus homo in space and time. When the scope of anthropology covers the biology of humankind, it examines human as an organism and explains human origin, human evolution, human differentiation and human variation as influenced by heredity and environment.

Scope of Anthropology - Secure IAS
This paper examines the nature of urban space and social relations, and interrogates how social anthropology understands and conducts research within cities. The paper draws upon a range of comparative ethnographic research and social theory to investigate the political, theoretical and methodological questions raised by the study of urban environments.

SAN12: Anthropology of Cities & Space | Department of ...
A nthropologists studying outer space might sound like fringe science, like something from “The X-Files” or some “ancient aliens” TV show, but we have been studying outer space as long as we’ve been studying people whose lives are influenced by it. In the fields of archaeoastronomy (how people understood the sky in the past) and ethnoastronomy (current cultural perceptions of the sky), scholars study how humans throughout history have looked up to the sky and wondered where we come ...

Archaeoastronomy and Other Ways to Study Space Culture
Cognitive anthropology seeks to explain patterns of shared knowledge, cultural innovation, and transmission over time and space using the methods and theories of the cognitive sciences (especially experimental psychology and evolutionary biology) often through close collaboration with historians, ethnographers, archaeologists, linguists, musicologists and other specialists engaged in the ...

Anthropology - Wikipedia
Abstract ? Abstract This review describes some recent, unexpected findings concerning variation in spatial language across cultures, and places them in the context of the general anthropology of space on the one hand, and theories of spatial cognition in the cognitive sciences on the other.
