Honda Element P2647 Code Fixl—YouTube

I have a 2004 Honda... I have a 2004 Honda Element. The oil was low and when I added oil, it began to episodically do the following. The check engine light will come on and refuse to go over 2700 rpms. If I go above 2700 rpm the motor shuts down and it just coasts until the rpms decrease to that level. Very nerve-racking in Atlanta traffic with bumper to bumper speeds in the 70's.

2004 Honda Element: The check engine light will come rpms…

Step 1 – Examine the check engine light on the dash. Turn on the ignition, and then check if the check engine light (CEL) is steady or flashing. A steady light typically indicates a problem with the vehicle's computer system, such as a sensor that is not delivering or receiving the correct data needed.

Honda: How to Reset the Check Engine Light | Honda-tech

Eddie spent 35 years in the automotive business with Honda. He is an ASE Certified Master Technician and has bruised knuckles to prove it. Your "Check Engine" light comes on when your car's onboard computer (or PCM, Powertrain Control Module) records some kind of problem.
