High-quality primary care is the foundation of the health care system. It provides continuous, person-centered, relationship-based care that considers the needs and preferences of individuals, families, and communities. Without access to high-quality primary care, minor health problems can spiral into chronic disease, chronic disease management becomes difficult and uncoordinated, visits to emergency departments increase, preventive care lags, and health care spending soars to unsustainable levels. Unequal access to primary care remains a concern, and the COVID-19 pandemic amplified pervasive economic, mental health, and social health disparities that ubiquitous, high-quality primary care might have reduced. Primary care is the only health care component where an increased supply is associated with better population health and more equitable outcomes. For this reason, primary care is a common good, which makes the strength and quality of the country's primary care services a public concern. Implementing High-Quality Primary Care: Rebuilding the Foundation of Health Care puts forth an evidence-based plan with actionable objectives and recommendations for implementing high-quality primary care in the United States. The implementation plan of this report balances national needs for scalable solutions while allowing for adaptations to meet local needs.

This work presents in English translation the largest collection ever assembled of the sayings and stories of Jesus in Arabic Islamic literature. In doing so, it traces a tradition of love and reverence for Jesus that has characterized Islamic thought for more than a thousand years. An invaluable resource for the history of religions, the collection documents how one culture, that of Islam, assimilated the towering religious figure of another, that of Christianity. As such, it is a work of great significance for the understanding of both, and of profound implications for modern-day intersectorian relations and ecumenical dialogue. Tarif Khalidi ' s introduction and commentaries place the sayings and stories in their historical context, showing how and why this " gospel " arose and the function it served within Muslim devotion. The Jesus that emerges here is a compelling figure of deep and life-giving spirituality. The sayings and stories, some 300 in number and arranged in chronological order, show us how the image of this Jesus evolved throughout a millennium of Islamic history.

This volume examines in detail the role of chronic inflammatory processes in the development of several types of cancer. Leading experts describe the latest results of molecular and cellular research on infection, cancer-related inflammation and tumorigenesis. Further, the clinical significance of these findings in preventing cancer progression and approaches to treating the diseases are discussed. Individual chapters cover cancer of the lung, colon, breast, brain, head and neck, pancreas, prostate, bladder, kidney, liver, cervix and skin as well as gastric cancer, sarcoma, lymphoma, leukemia and multiple myeloma.

The papers in this volume, which have sprung from collaboration between archaeologists and seismologists, investigate the social, historical and physical effects of ancient earthquakes. Sites where archaeological and historical evidence of palaeoseismic events is investigated include Mycenae, Late Helladic III Kynos, 13th century BC Tiryns and Late Minoan Crete. Others adopt a scientific approach to the effects of earthquakes such as the uplift of Greek coastal sites, the disappearance of Dioscuria and Sebastopolis in Colchis and the collapse of the Mycenaean palace system.

This comprehensive volume focuses on anti-inflammatory nutraceuticals and their role in various chronic diseases. Food and Drug Administration (FDA) approved drugs such as steroids, non-steroidal anti-inflammatory drugs (NSAIDS), statins and metformin have been shown to modulate inflammatory pathways, but their long-term intake has been associated with numerous side effects. This means that there is enormous potential for dietary agents that can modulate inflammatory pathways in humans. Leading experts describe the latest research on the role of anti-inflammatory nutraceuticals in preventing and treating chronic diseases.

The English version of the book has been extensively revised and expanded since its original publication in German. This edition includes a new preface and an updated bibliography.

This volume explores the economies of countries in Asia, as well as the former Soviet socialist bloc countries of Central Asia and the Balkans. It analyses the region from the perspective of globalization and regional economic integration, economic growth and sustainable development, international trade and finance, money market and banking systems, labor market and external migration, energy and agricultural sectors. This book will appeal to anyone who is interested in economies of this region, their transition process towards a market economy regime, and their integration in the global world, including academicians from any field of social sciences, as well as decision makers, politicians, businessmen and journalists.

"The book Power Imbalance, Bullying and Harassment in Academia and the Glocal (Local and Global) Workplace introduces a candid and open discussion on a sensitive topic. Breaking the "code of silence" on bullying and harassment (including sexual harassment) in academia and the glocal workplace is the central focus of the book. The author advocates a call to action to hold perpetrators and the executive leadership teams of higher education institutions and corporate organizations accountable and responsible for bullying and harassment behaviors in the glocal (local and global) workplace. The book aims to raise the bar for ethical considerations in working with employees who may be vulnerable in the glocal workplace; to call out the perpetrators of bullying and harassment in the glocal workplace and academia; to ensure that the mental wellbeing of employees is a priority; to place responsibility and accountability for bullying and harassment on the shoulders of the executive leadership of international higher education institutions and corporations; and to call upon stakeholder groups to shatter the "code of silence" with a youtoobullyharrasser movement. Employers are expected to enhance their vigilance on the matter of bullying and harassment and to report perpetrators through a national and international monitoring system which names the perpetrators and prevents them from causing harm in their current organization and from moving surreptitiously to other workplace communities. This book is an account of bullying and harassment in academia and other workplaces written by those who experienced and/or witnessed bullying and harassment. It includes chapters on the political economic factors influencing equity, diversity and inclusion agendas over decades; the impact of bullying and harassment in the COVID-19 period when various communities are vulnerable; and critically reviews and presents real-life scenarios in academia and the glocal workplace which are both covert and overt. However, these underhanded activities, often with the knowledge and approval of executive leadership, remain unchallenged by employees and stakeholder groups because of the threat of loss of one's livelihood. The contributors bring valuable insights into the covert operations of the perpetrators, who are sometimes the executive leaders (women and men) themselves. This book is essential for understanding the dark web of deceit, lies, conspiracies and mobbing cultures which ensnares innocent targets, across glocal organizational contexts. Profiles and descriptors within the chapters and case studies act as alert signals to identify bullies. The contributors bring personal, creative and academic perspectives together, offering the readership sobering and authentic accounts of traumatic experiences and challenges in the glocal workplace"--
