5 DAY ADVANCE SURVEILLANCE COURSE. . The 5 Day Advanced Surveillance Course was initially written to train current security staff of Vanquish Security to enable them to conduct covert surveillance ops to the high standards set out by the company. Word spread quickly and before we knew it, Vanquish had set up a special training division, later to become Vanquish Training Academy, to take on all applicants who wanted to attend the highly demanding course.

## 5 Day Advanced Surveillance Training Course

This training manual on Advanced Surveillance covers all aspects of carrying out a physical covert surveillance in order to gather intelligence and evidence. This is an interesting topic to read about, but be warned, it takes a lot of effort and practice time to learn how to do this. While most of us don't have the need to know how to surveil, or have any reasons to learn how to beat surveillance, but who knows what will happen in the future.

Peter Jenkins is the director of British surveillance training company ISS Training Ltd. He has been managing his own commercial and corporate investigation business in the United Kingdom for the past 20 years. Previous to this, Peter spent 12 years in the Royal Marines Commandos where he specialised in various roles which included reconnaissance, intelligence, counter terrorism and instructing.

This training manual covers all aspects of carrying out a physical covert surveillance in order to gather intelligence and evidence.

"Dan Sommer's new book Surveillance Detection Specialist should be compulsory reading for every security professional, security consultant and close protection officer seriously engaged in countering international terrorism. With lots of examples and illustrations, Dan studies in detail the mind of the terrorist and examines how, with proper surveillance detection, many of the appalling instances of global terrorism could have actually been prevented. Dan explains in detail the work of the Surveillance Detection Specialist and the essential importance his role is within the security detail. Chapters include observation skills, logistics, surveillance methods, operations, reporting and administration, hostile surveillance, briefings, training and threat identification." Robin Barratt - Founder of the World Federation of Bodyguards and author of "How To Find Work As A Bodyguard" The "Grey Book" and "Doing The Doors"

For its candid examination of the historical, political and sociological contexts of international terrorism, Terrorist Modus

Operandi is a valuable addition to counter terrorism classics. It is in the category of "must read" for anyone who wants to understand the ideology and causes behind terrorism and how we can and should respond to acts of terrorism. Terrorism Modus Operandi covers the history and development of terrorism and explains in detail the full terrorist planning process from its "Original Cause" through the 8-Phases of the terrorist planning process to execution, and escape and exploitation. Including case studies and in-depth researched statistics of international terrorism incidents and specific terror groups. The final chapters explain the similarities between terrorism and organized crime and explain the best methods for detecting the terrorist planning process. According to Dan Sommer, an understanding of the mindset of terrorists is vital to success in the war on terror.

This new surveillance training book has been compiled as the ultimate guide and reference book for the surveillance operative.

Focusing on countermeasures against orchestrated cyber-attacks, Cyber Security Culture is research-based and reinforced with insights from experts who do not normally release information into the public arena. It will enable managers of organizations across different industrial sectors and government agencies to better understand how organizational learning and training can be utilized to develop a culture that ultimately protects an organization from attacks. Peter Trim and David Upton believe that the speed and complexity of cyber-attacks demand a different approach to security management, including scenario-based planning and training, to supplement security policies and technical protection systems. The authors provide in-depth understanding of how organizational learning can produce cultural change addressing the behaviour of individuals, as well as machines. They provide information to help managers form policy to prevent cyber intrusions, to put robust security systems and procedures in place and to arrange appropriate training interventions such as table top exercises. Guidance embracing current and future threats and addressing issues such as social engineering is included. Although the work is embedded in a theoretical framework, non-technical staff will find the book of practical use because it renders highly technical subjects accessible and links firmly with areas beyond ICT, such as human resource management - in relation to bridging the education/training divide and allowing organizational learning to be embraced. This book will interest Government officials, policy advisors, law enforcement officers and senior managers within companies, as well as academics and students in a range of disciplines including management and computer science.

Over 5,300 total pages . . . . MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six man team capable of conducting specific

missions behind enemy lines. Employed as part of the Marine Air-Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include: surface, subsurface and airborne operations. Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air-delivery, and re-supply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area. Conduct limited scale raids and ambushes. Just a SAMPLE of the included publications: BASIC RECONNAISSANCE COURSE PREPARATION GUIDE RECONNAISSANCE (RECON) TRAINING AND READINESS (T&R) MANUAL RECONNAISSANCE REPORTS GUIDE GROUND RECONNAISSANCE OPERATIONS GROUND COMBAT OPERATIONS Supporting Arms Observer, Spotter and Controller DEEP AIR SUPPORT SCOUTING AND PATROLLING Civil Affairs Tactics, Techniques, and Procedures MAGTF Intelligence Production and Analysis Counterintelligence Close Air Support Military Operations on Urbanized Terrain (MOUT) Convoy Operations Handbook TRAINING SUPPORT PACKAGE FOR: CONVOY SURVIVABILITY Convoy Operations Battle Book Tactics, Techniques, and Procedures for Training, Planning and Executing Convoy Operations Urban Attacks

Police officers working in the 21st century must not only possess vast technical knowledge, but also be able to respond with logic and reason when under pressure. Producing a highly professional police officer requires the right combination of formal education and technical training. Police Education and Training in a Global Society explores the similarities and differences in officer training around the world.

Intended as a reference and training manual for the person who is likely to carry out surveillance in the course of their work. It covers all aspects of surveillance work. However, it is also intended to interest the lay person.

A sense of fatigue dogs the fitness world. Many of the new programs that are tagged as groundbreaking are actually recycled ideas. Foundation offers something completely different for novices and athletes alike: a simple program with powerful and proven results that will remedy bad posture, alleviate back pain, and help readers break through fitness challenges and plateaus. Dr. Eric Goodman, a brilliant and dynamic young chiropractor, teams up with Peter Park, one of the top trainers in the United States, to radically redefine the core--shifting the focus from the front of the body to the back. Their groundbreaking approach works to strengthen the lower back and the full posterior chain and correct poor movement patterns by addressing mechanical imbalances and weaknesses. Foundation training involves simple movement patterns and is equipment free, creating maximum power, flexibility, and endurance. Word-of-mouth enthusiasm has inspired both Hollywood luminaries and world-class athletes to make Foundation training the core of their fitness programs. Eric and Peter's client list has grown exponentially to include Lance Armstrong, NBA star Derek Fisher, world-champion surfer Kelly Slater, and actor Matthew McConaughey.
