Iowa State University - Ames. In Extension work in the U.S., we enjoy a direct and positive relationship with our land-grant universities. In most other countries, Extension is organized as a unit of the Ministry of Agriculture of the government and relationships must be built with appropriate universities.

Extension in Developing Countries: An Example

By contrast, in many countries (e.g. India, Tunisia, Zimbabwe and Zambia) agricultural extension is linked to agricultural production services. 1.3 Agricultural and rural extension: an expanded concept When agricultural extension is combined with rural extension goals, the extension function ranges even more widely in its purposes.

Agricultural and Rural Extension Worldwide: Options for ...

Abstract. Given the stagnant agricultural productivity and persistent food insecurity in low income countries—notably in sub-Saharan Africa (SSA)—there has been continued interest in the adoption of new technology and its impact on productivity in these regions. To increase crop yields and sustain yield gains, recent case studies of technology adoption unanimously recommend the adoption of integrated farm management systems, particularly in SSA.

Technology adoption, impact, and extension in developing ...

In India, the private agricultural sector plays a major role in agricultural extension service provision. It fills the gap of inefficient input delivery and customized advisory services.

Agricultural Extension Services - an overview ...

Nature of the extension work Since most of the population of the countries, hardest hit by AIDS, lives in rural areas, a large number of people affected by HIV/AIDS in sub-Saharan Africa are, directly or indirectly, engaged in farming. The workers, who have the most frequent contact with the small-scale farmers, are the field extension agents.

THE CHALLENGE TO AGRICULTURAL EXTENSION SERVICES

I intend to improve the training of farmers. This is important for developing countries that their agriculture is not only thriving but is sustainable. Teaching sustainable techniques to farmers is one of the ways that demonstrates how to solve poverty, because when a country's natural resources are at their top potential, so is its economy.
