illustrated book covers the basic principles of each science, key discoveries, recent revolutionary advances, and the problems that science still needs to solve for our Earth. Nye and coauthor Gregory Mone present the most difficult theories and facts in an easy-to-comprehend, humorous way. They interviewed numerous specialists from around the world, in each of the fields discussed, whose insights are included throughout. Also included are experiments kids can do themselves to bring science to life! Features photographs, illustrations, diagrams, glossary, bibliography, and index.

Just as World War II called an earlier generation to greatness, so the climate crisis is calling today's rising youth to action: to create a better future. In UNSTOPPABLE, Bill Nye crystallizes and expands the message for which he is best known and beloved. That message is that with a combination of optimism and scientific curiosity, all obstacles become opportunities, and the possibilities of our world become limitless. With a scientist's thirst for knowledge and an engineer's vision of what can be, Bill Nye sees today's environmental issues not as insurmountable, depressing problems but as chances for our society to rise to the challenge and create a cleaner, healthier, smarter world. We need not accept that transportation consumes half our energy, and that two-thirds of the energy you put into your car is immediately thrown away out the tailpipe. We need not accept that dangerous emissions are the price we must pay for a vibrant economy and a comfortable life. Above all, we need not accept that we will leave our children a planet that is dirty, overheated, and depleted of resources. As Bill shares his vision, he debunks some of the most persistent myths and misunderstandings about global warming. When you are done reading, you'll be enlightened and empowered. Chances are, you'll be smiling, too, ready to join Bill and change the world. In Unstoppable: Harnessing Science to Change the World, the New York Times bestselling author of Undeniable: Evolution and the Science of Creation and former host of "Bill Nye the Science Guy" issues a new challenge to today's generation: to make a cleaner, more efficient, and happier world. Praise for UNDENIABLE: "With his charming, breezy, narrative style, Bill empowers the reader to see the natural world as it is, not as some would wish it to be. He does it right. And, as I expected, he does it best." -Neil deGrasse Tyson, Ph.D, host of COSMOS "Bill Nye, 'the Science Guy,' has become a veritable cultural icon....[T]he title of his new book on evolution...[is] 'Undeniable,' because, yes, there are many Americans who still deny what Darwin and other scientists long ago proved." -Frank Bruni, The New York Times "With a jaunty bow tie and boyish enthusiasm, Bill Nye the Science Guy has spent decades decoding scientific topics, from germs to volcanoes, for television audiences....In his new book, Nye delights in how [evolution] helps to unlock the mysteries of everything from bumblebees to human origins to our place in the universe." -National Geographic "When it comes to Bill Nye, 'Science Guy' doesn't even begin to cover it. When he's not being summoned to act as a voice of reason for news outlets or leading meetings as CEO of the Planetary Society, he is living the life of a best-selling author....His recently published book, 'Undeniable: Evolution and the Science of Creation,' enlightens readers while using a conversational, educational tone. After all, it's his ability to break down even the most complicated topics into bite-size pieces that made him such a hit on his '90s children's show 'Bill Nye, the Science Guy.'" -The Boston Globe "Mr. Nye writes briskly and accessibly...[and] makes an eloquent case for evolution." -The Wall Street Journal "Because [Bill Nye is] a scientist, he has no doubts that the 'deniers' of evolution are flat wrong. And because he's a performer, his book is fun to read and easy to absorb." -The Washington Post "Ignite your inner scientist when Nye, known for delivering geeky intel with clarity and charm, takes on one of society's most hotly debated topics (yes, still)." -Time Out New York

Great news for multitasking middle school teachers: Science educators Terry Shiverdecker and Jessica Fries-Gaither can help you blend inquiry-based science and literacy instruction to support student learning and maximize your time. Several unique features make *Inquiring Scientists, Inquiring Readers in Middle School* a valuable resource:

- Lessons integrate all aspects of literacy—reading, writing, speaking, listening, and viewing. The texts are relevant nonfiction, including trade books, newspaper and magazine articles, online material, infographics, and even videos.
- A learning-cycle framework helps students deepen their understanding with data collection and analysis before reading about a concept.
- Ten investigations support current standards and encompass life, physical, and Earth and space sciences. Units range from “ Chemistry, Toys, and Accidental Inventions ” to “ Thermal Energy: An Ice Cube ’ s Kryptonite! ”

The authors have made sure the book is teacher-friendly. Each unit comes with scientific background, a list of common misconceptions, an annotated text list, safety considerations, differentiation strategies, reproducible student pages, and assessments. This middle school resource is a follow-up to the authors ’ award-winning *Inquiring Scientists, Inquiring Readers* for grades 3–5, which one reviewer called “ very thorough, and any science teacher ’ s dream to read. ” The book will change the way you think about engaging your students in science and literacy.

Several topics, including matter, heat, light, electricity, magnetism, weather, and space, are introduced in this quick tour of the world of science.

Revealing the mechanics of evolutionary theory, the scientist, engineer and inventor presents a compelling argument for the scientific unviability of creationism and insists that creationism's place in the science classroom is harmful not only to our children, but to the future of the greater world as well.

Take Five! for Science transforms those first five minutes of class into engaging writing opportunities. Students will brainstorm their way through 75 topics within three main science divisions: earth, life, and physical science. All prompts are aligned with NGSS and ELA CCSS as students debate, compare, investigate, question, and design in response to 150 prompts. Whether your students are working to save endangered ecosystems, investigating distant constellations, creating unusual animals, or constructing a design solution, these diverse and creative prompts will have students looking forward to each day when they're asked to "Take Five!" for Science. Begin every day of the school year with a burst of writing in the science discipline with this comprehensive and fun resource. Ready? Set? Take Five!

With Millions watching this live debate on February 4, 2014, "Bill Nye, the Science Guy" squared off with Answers in Genesis founder and president Ken Ham. This event echoed the worldviews at work in our lives today and put two of the most unique and recognizable advocates of their positions on the same stage to face not only each other, but the many who watched. More answers, more perspectives,
