Nod Away is set on a near-future version of earth. A deep space transport has been developed to take a small crew to an earth-like, habitable planet in a nearby system in an attempt to begin colonization/repopulation. The internet is now telepathic and referred to as the “innernet.” When the hub is revealed to be a human child, Melody McCabe is hired to develop the new nexus on the second International Space Station. Working within the structure of sci-fi, Nod Away moves back and forth between physical and psychological worlds, utilizing traditional and abstract storytelling styles to explore what consciousness could be, where it could possibly be located, and what function or point it might serve.

Juan Rulfo is one of the most important writers of twentieth-century Mexico, though he wrote only two books—the novel *Pedro Páramo* (1955) and the short story collection *El llano en llamas* (1953). First translated into English in 1967 as *The Burning Plain*, these starkly realistic stories create a psychologically acute portrait of poverty and dignity in the countryside at a time when Mexico was undergoing rapid industrialization following the upheavals of the Revolution. According to Ilan Stavans, the stories' "depth seems almost inexhaustible: with a few strokes, Rulfo creates a complex human landscape defined by desolation. These stories are lessons in morality. . . . They are also astonishing examples of artistic distillation." To introduce a new generation of readers to Rulfo's unsurpassable literary talents, this new translation repositions the collection as a classic of world literature. Working from the definitive Spanish edition of *El llano en llamas* established by the Fundación Juan Rulfo, Ilan Stavans and co-translator Harold Augenbram present fresh translations of the original fifteen stories,

as well as two more stories that have not appeared in English before—"The Legacy of Matilde Arcángel" and "The Day of the Collapse." The translators have artfully preserved the author's "peasantisms," in appreciation of the distinctive voices of his characters. Such careful, elegiac rendering of the stories perfectly suits Rulfo's Mexico, in which people on the edge of despair nonetheless retain a sense of self, of integrity that will not be taken away.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Contains Books #7 and #8, The Reformer and The Tyrant, in the best selling General series The Empire of Man has fallen and a new Dark Age is upon the stars. With planets cut off and reduced to subsistence and ignorance, humanity has nearly forgotten its past greatness. But one battle computer has survived the Collapse. He is Center. And Center is determined to find and aid leaders who can return a star-faring republic to the galaxy. The first of these leaders is Raj Whitehall, a man born to be a general, and molded to retake civilization itself from the jaws of barbarism. The Reformer by S.M. Stirling and David Drake On Hafardine, civilization had fallen further than most. That men came from the stars was not even a rumor of memory in Adrian Gellert's day. The Empire of Vanbret spread across the lands in a sterile splendor that could only end in another collapse, more ignominious and complete than the first.

Adrian Gellert was a philosopher, a Student of the Grove. His greatest desire was a life of contemplation in the service of wisdom . . . until he touched the 'holy relic' that contained the disincarnate minds of Raj Whitehall and Center. On that day, Adrian's search for wisdom would lead him to a life of action, from the law-courts of Vanbret to the pirate cities of the Archipelago and battlefields bloodier than any in the history he'd learned. The prize was the future of humanity. The Tyrant by Eric Flint and David Drake On the planet Hafardine, civilization must rediscover progress or collapse. Adrian, guided by disembodied electronic mentors from space, has brought gunpowder and steam power to the Kingdom of the Isles to break the stranglehold of the Empire. But he will have to avoid being killed by the suspicious King he serves, by the barbarians he must recruit, and even by his insanely vengeful brother. What is in the best interest of our students? Is it teaching to the newest standards movement, like the Common Core? Teaching that prepares students to take a test? Or is it something more meaningful and authentic? In his new book, *In the Best Interest of Students*, Kelly Gallagher notes that there are real strengths in the Common Core standards, and there are significant weaknesses as well. He takes the long view, reminding us that standards come and go but what remains constant is the need to stay true to what we know works in the teaching of reading, writing, speaking and listening. Instead of blindly adhering to the latest standards movement, Kelly advocates:

- Dialing up the amount of reading and writing students are doing.
- Balancing rigorous, high-quality literature and non-fiction with high-interest, student-selected titles.
- Giving students much more choice when it comes to reading and writing activities.
- Encouraging readers to deepen their comprehension by moving beyond the "four corners of the text."
- Using modeling to enrich students' writing skills in the prewriting, drafting, and revision stages.
- Helping young writers to achieve more authenticity

through the blending of genres. · Resisting the de-emphasis of narrative and imaginative reading and writing. · Providing students with more opportunities to sharpen their listening and speaking skills · Planning lessons that move beyond Common Core expectations. In this provocative and insightful new book, Kelly surveys the teaching landscape since the publication of his highly regarded book *Readicide*, and finds that although some progress has been made, more needs to be done. Amid the frenzy of trying to teach to a new set of standards, Kelly Gallagher is a strong voice of reason, reminding us that instruction should be anchored around one guiding question: What is in the best interest of our students?
