Impact of Catastrophic Brain Injury Guidelines on Donor ...

A patient who sustains catastrophic or devastating brain injuries requires intensive monitoring and treatment, typically in an intensive care setting. Recommended treatment guidelines include: Maintain systolic blood pressure (SBP) greater than 100 mmHg or mean arterial pressure greater than 60 mmHg. Treat Diabetes Insipidus to prevent intravascular fluid depletion.

CATASTROPHIC BRAIN INJURY

GUIDELINES: Prior to the declaration of brain death Statement of Purpose: The purpose of these guidelines is to provide medical direction for the physiologic maintenance of the patients with non-survivable brain injuries identified as a potential organ donor.

Catastrophic Brain Injury Guidelines Compliance with the 4 ACS requirements was not associated with increased organ donation outcomes. However, having catastrophic brain injury guidelines (CBIGs) and the presence of a trauma surgeon on a donor council were associated with significantly more organ donors per 1000 trauma admissions (6.3 vs. 4.2 and 6.0 vs. 4.2, respectively, $p < 0.05$).
