The China–United States trade war  
(Chinese: 中美贸易战; pinyin: Zhōngmèi  
Màoyìzhàn) is an ongoing economic  
conflict between China and the United  
States. President Donald Trump in 2018  
began setting tariffs and other trade  
barriers on China with the goal of forcing  
it to make changes to what the U.S. says  
are "unfair trade practices" and intellectual  
property theft.

on world business and the world economy. At the same time, there are concerns about China's political system, China's human rights record and the degree to which reform - the development of 'socialism with Chinese characteristics' - represent real liberalization. Providing an overview of earlier events in order to set the context in which economic and political development have taken place, the book traces economic and political growth in China from the early 1990s to the present. Covering Hong Kong, Macao, Tibet and Taiwan, the book discusses China's relations, including international trade with its neighbours and with the international community more widely. Other key topics covered include the growth of the market, the reform of state owned enterprises, human rights and SARS.

This study analyzes the United States policies regarding China during the administration of President George W. Bush. Chi Wang examines the relationship between the United States and China from its tense origins to its current stability and shows that the China policy of the U.S. is ultimately based on pragmatic national interest that eventually overcomes short-term ideological difficulties or mistakes by inexperienced American administrations. Briefly touching on the China-policy legacy of Presidents George H.W. Bush and Bill Clinton, Wang provides a review of significant developments in U.S.-China policy during President George W. Bush's first term in office. By following with an analysis of the varied agendas of Bush's foreign policy advisors during his second term, readers are able to trace the influence of advisors on the president's China policy. Wang chronicles the

reordering of U.S. security priorities after September 11, showing how this prompted Washington to embrace China in a measured partnership and has resulted in the short-term stabilization of U.S.-China relations.

How to define a Chinese national identity remains as hotly contested a question among today's Chinese citizens as it has been among foreign observers. This volume brings together ten new essays by an interdisciplinary group of leading sinologists and offers a comprehensive framework for understanding the nature of Chinese national identity in past and contemporary settings.

approximately 2300 Chinese characters are classified according to 224 'primitives' upon which they are based. For each character Father Wieger gives the modern form, its archaic form, literary pronunciation (Wade system), explanations of origin, semantic content of component parts, related characters, variants forms, quotations of classical usage, and similar material. To make his book more useful Father Wieger has also incorporated a tremendous number of reading aids for the student - listings of the primitives; an index of the characters analyzed, arranged by number of strokes; a listing of 858 phonetic elements, arranged by number of strokes; a listing of about 10,000 characters by phonetic element; a lexicon by transliteration, comprising about 7,000 characters; and a lexicon of about 10,000 characters according to the customary modern system

The Tang dynasty, lasting from 618 to 907, was the high point of medieval Chinese history, featuring unprecedented achievements in governmental organization, economic and territorial expansion, literature, the arts, and religion. Many Tang practices continued, with various developments, to influence Chinese society for the next thousand years. For these and other reasons the Tang has been a key focus of Western sinologists. This volume presents English-language reprints of fifty-seven critical studies of the Tang, in the three general categories of political history, literature and cultural history, and religion. The articles and book chapters included here are important scholarly benchmarks that will serve as the starting-point for anyone interested in the study of medieval China.

Many scholars have noted the role of China's demand for silver in the emergence of the modern world. This book discusses the interaction of this demand and the early-nineteenth-century Latin American independence movements, changes in the world economy, the resulting disruptions in the Qing dynasty, and the transformation from the High Qing to modern China. Man-houng Lin shows how the disruption in the world's silver supply caused by the turmoil in Latin America and subsequent changes in global markets led to the massive outflow of silver from China and the crisis of the Qing empire. During the first stage of this dynastic crisis, traditional ideas favoring plural centers of power became more popular than they ever had been. As the crisis developed, however, statist ideas came to the fore. Even though the Qing

survived with the resumption of the influx of Latin American silver, its status relative to Japan in the East Asian order slipped. The statist inclination, although moderated to a degree in the modern period, is still ascendant in China today. These changes—Qing China's near-collapse, the beginning of its eclipse by Japan in the East Asian order, and shifting notions of the proper relationship between state and market and between state and society—led to “China upside down.”

"The Beijing-Islamabad axis plays a central role in Asia's geopolitics, from India's rise to the prospects for a post-American Afghanistan, from the threat of nuclear terrorism to the continent's new map of mines, ports and pipelines. with Islamic militancy and the heart of its efforts to counter-balance the emerging US-India partnership. For decades, each country has been the other's only 'all-weather' friend. Yet the relationship is still little understood. The wildest claims about it are widely believed, while many of its most dramatic developments are hidden from the public eye. This book sets out the recent history of Sino-Pakistani ties and their ramifications for the West, for India, for Afghanistan, and for Asia as a whole. It tells the stories behind some of its most sensitive aspects, including Beijing's support for Pakistan's nuclear program, China's dealings with the Taliban, and the Chinese military's planning for crises in Pakistan. It describes a relationship increasingly shaped by Pakistan's internal strife, and the dilemmas China faces between the need for regional stability and the imperative for strategic competition
