Successful Collaborations
Organizations can have, creating results they are much more likely to achieve together than alone. Collaboration, therefore, is not another program or project. This means collaboration must be approached differently.

Collaboration: What Makes It Work? - Karen Ray Associates

Collaboration is sometimes made to sound like an ultra-smooth process of people working together seamlessly toward a shared goal. The reality is that few collaborating teams work for long without a certain amount of arguing, dissenting, and emoting. Most of the time, this friction occurs for the simple reason that we differ from each other. We have different skills and experiences.

published in 1992, showed that researchers and practitioners alike found it a useful tool. They appreciated its emphasis on providing a practical reference for decision-making that built upon credible, research-based information. The 21st century has brought with it rapid changes and increasingly complex challenges. This third edition in large part responds to the complexity witnessed daily in the authors' work with community, nonprofit, and government organizations. It offers new research and insights paired with practitioner wisdom, adding a "how-to" perspective to help readers put the success factors to work. Nearly 25 years after the first edition was published, it is not just the "how" of collaboration that has changed--who we are collaborating with has changed as well. Today, nearly every collaboration involves some degree of working across difference. Bringing together diverse people, organizations, or sectors in a way that will foster collaborative success requires a unique set of skills. This third edition will ground you in the factors that support successful collaboration and assist you in incorporating those factors into your work.

This literature review has the goals of: (1) reviewing and summarizing the existing research literature on factors which influence the success of collaboration; and (2) reporting the results of the research literature review so that people who want to initiate or enhance a collaborative effort can benefit from the experience of others. The review used computer-based bibliographies, contacted researchers interested in the topic, and tracked down bibliographic references in each document obtained. The scope of the

search included the health, social science, education, and public affairs arenas. From the 133 studies examined, the screening excluded those documents that were general "how to" manuals, did not meet the definition of collaboration, or failed to meet other research criteria. After the screening, 18 studies remained and were reviewed carefully. The findings of the studies were blended together to identify 19 factors that influence successful collaboration. Contains 32 references. (EH)

A plan for conquering collaborative overload to drive performance and innovation, reduce burnout, and enhance well-being. Most organizations have created always-on work contexts that are burning people out and hurting performance rather than delivering productivity, innovation and engagement. Collaborative work consumes 85% of employees' time and is drifting earlier into the morning, later into the night, and deeper into the weekend. The dilemma is that we all need to collaborate more to create effective organizations and vibrant careers for ourselves. But conventional wisdom on teamwork and collaboration has created too much of the wrong kind of collaboration, which hurts our performance, health and overall well-being. In *Beyond Collaboration Overload*, Babson professor Rob Cross solves this paradox by showing how top performers who thrive at work collaborate in a more purposeful way that makes them 18-24% more efficient than their peers. Good collaborators are distinguished by the efficiency and intentionality of their collaboration—not the size of their network or the length of their workday. Through landmark research with more than 300 organizations, in-depth stories, and tools, *Beyond Collaboration Overload* will coach you to reclaim close to a day a week when you: Identify and challenge beliefs that lead you to collaborate too quickly Impose structure in your work to prevent unproductive collaboration Alter behaviors to create more efficient collaboration It then outlines how successful people invest this reclaimed time to: Cultivate a broad network—not a big one—for

innovation and scale Energize others—a strong predictor of high performance Connect with others to reduce micro-stressors and enhance physical and mental well-being Cross' framework provides relief from the definitive problem of our age—dysfunctional collaboration at the expense of our performance, health and overall well-being.

Collaboration is key for organizations in the 21st century, yet few business people have been trained to teach this skill. How do you advance ideas in a collaborative way and then communicate them throughout your company? In this practical book, author Gretchen Anderson shows you how to generate ideas with others while gaining buy-in from all levels of your organization. Product managers, designers, marketers, technical leaders, and executives will obtain better insight into how team members work together to make decisions. Through tangible exercises and techniques, you ' ll learn how to turn promising ideas into products, services, and solutions that make a real difference in the market. Use a framework to develop ideas into hypotheses to be tested and refined Avoid common pitfalls in the collaboration process Align communication approaches to ensure that collaboration is effective and inclusive Structure events or meetings for different types of collaboration depending on the people involved Practice giving and receiving critiques to foster inclusion without resorting to consensus-based decisions

Every day we work with others to solve problems and make decisions, but the experience is often stressful, frustrating, and inefficient. In *How to Make Collaboration Work*, David Straus, a pioneer in

the field of group problem solving, introduces five principles of collaboration that have been proven successful time and again in nearly every conceivable setting. Straus draws on his thirty years of personal and professional experience to show how these principles have been applied by organizations as diverse as Ford Motor Company, the U.S. Environmental Protection Agency, Harvard Business School Publishing, Boston Public Schools, Kaiser Permanente, the city of Denver, and many others. *How to Make Collaboration Work* shows how collaboration can become a joy rather than a chore—a kind of chemical reaction that releases far more energy than it consumes.

Working Across Boundaries is a practical guide for nonprofit and government professionals who want to learn the techniques and strategies of successful collaboration. Written by Russell M. Linden, one of the most widely recognized experts in organizational change, this no-nonsense book shows how to make collaboration work in the real world. It offers practitioners a framework for developing collaborative relationships and shows them how to adopt strategies that have proven to be successful with a wide range of organizations. Filled with in-depth case studies—including a particularly challenging case in which police officers and social workers overcome the inherent differences in their cultures to help abused children—the book clearly shows how organizations have dealt with the hard issues of collaboration. *Working Across Boundaries* includes information on how to select potential partners, guidelines for determining what kinds of projects lend themselves to collaboration and which do not, suggestions on how to avoid common pitfalls of collaboration, strategies proven to work consistently, the phases most collaborative projects go through, and the nature of collaborative leadership.

training and project development. In *Working at a Distance*, Cassandra Smith provides a detailed, comprehensible virtual team business model for managers, professionals, teachers or students involved globally with such initiatives. The author argues that guidance for members of such teams is generally lacking. They are left to figure out their places on the team and face a host of other issues, the impact of which can be ameliorated with a virtual team business model that anyone working at a distance can follow. Cassandra Smith has taught courses online and facilitated virtual teams. The model she has created based on that experience maximizes the benefit to be gained from individual members' skills, personality styles, and the strengths of each active participant. It will enable teams to set up viable working plans and work cohesively at a distance. The model also provides for conflict management in virtual environments. Built on research and practical experience, the empirical data and subject experts' views captured by the author and the model offered here will help all stakeholders of businesses or educational institutions where managers, employees and clients; or teachers and students are working at a distance to achieve desired outcomes.
