| BUNKEE INT'L LIMITED~~

Ductile iron pipes and fittings have high corrosion resistance, are lined with cement or resins, and usually coated with zinc plus bitumen paint, which solves the problems of corrosion that grey iron pipes or steel pipes can't solve. For ductile iron pipes, standard Portland cement mortar lining according to IS04179 is the most common in the market and usually meets the projects' requirements.

Ductile iron pipes and fittings run through all areas and irrigate all installations and buildings of plants. Their resistance to physical and chemical stresses, and pressure is crucial. Ductile iron is the REFERENCE material of FM underground networks. Pipes and fittings approved by FM approval standard conform to the EN 545 first.

Ductile Iron Pipe were introduced to the market in 1955. Although nearly identical chemically, the two irons are quite different metallurgically. The now obsolete standard for Cast Iron Pipe (ANSI/AWWA A21.6/C106) required an iron strength of 18/40 (18,000 psi Bursting Tensile Resistance and 40,000 psi Ring Modulus of Rupture.)
