. Renewal of Life by Transmission. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word "control" in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment.

On 23 May 2019, when the results of the general elections were announced, Narendra Modi and the BJP-led NDA coalition were voted back to power with an overwhelming majority. To some, the numbers of Modi's victory came as something of a surprise; for others, the BJP's triumph was a vindication of their belief in the government and its policies. Irrespective of one's political standpoint, one thing was beyond dispute: this was a landmark verdict, one that deserved to be reported and analysed with intelligence -- and without bias.Rajdeep Sardesai's new book, 2019: How Modi Won India, does just that. What was it that gave Modi an edge over the opposition for the second time in five years? How was the BJP able to trounce its rivals in states that were once Congress bastions? What was the core issue in the election: a development agenda or national pride? As he relives the excitement of the many twists and turns that took place over the last five years, culminating in the 2019 election results, Rajdeep helps the reader make sense of the contours and characteristics of a rapidly changing India, its politics and its newsmakers. If the 2014 elections changed India, 2019 may well have defined what 'new India' is likely to be all about. 2019: How Modi Won India takes a look at that fascinating story, which is still developing.

"This resource book discusses the economic arguments that could (and could not) be put forth to support the case for investing in the social determinants of health on average and in the reduction in socially determined health inequalities. It provides an overview and introduction into how economists would approach the assessment of the economic motivation to invest in the social determinants of health and socially determined health inequities, including what the major challenges are in this assessment. It illustrates the extent to which an economic argument can be made in favour of investment in 3 major social determinants of health areas: education, social protection, and urban development and infrastructure. It describes whether education policy, social protection, and urban development, housing and transport policy can act as health policy"--

This publication is intended to contribute to prevention and control of the morbidity and mortality associated with dengue and to serve as an authoritative reference source for health workers and researchers. These guidelines are not intended to replace national guidelines but to assist in the development of national or regional guidelines. They are expected to remain valid for five years (until 2014), although developments in research could change their validity.--Publisher's description

The Chandra Shekhar Government Had Fallen. Fresh Elections Had Been Called. Yashwant Sinha, Finance Minister In The Caretaker Government, Was In Patna, Contesting For The Lok Sabha Against Tough Opposition, When A Senior Officer From The Finance Ministry Brought An Urgent File For His Signature: India Needed To Mortgage Gold To Obtain A Loan From The Bank Of England To Tide Over A Payments Crisis There Were Just Enough Foreign Exchange Reserves To Pay For Two Weeks Imports. The Crisis Was Not Of Their Government S Making, But It Devolved On Sinha To Take This Drastic Step. If He Ever Got The Opportunity, He Promised Himself, He Would Make Sure That The Country Never Had To Face Such A Crisis Again. The Opportunity Came In 1998, When Sinha Was Appointed Finance Minister In The Nda Government Led By Vajpayee And Was Faced With Yet Another Crisis: The Nuclear Tests In May That Year Resulted In Sanctions And A Possible Flashpoint. The Finance Minister S Decision To Issue The Resurgent India Bonds Helped Tide Over It, Raising 4.25 Billion In Two Weeks From Nris, And The Country Hasn T Looked Back Since. Yashwant Sinha Was Finance Minister For Four Years, Until 2002, And Presented Five Budgets. In Confessions Of A Swadeshi Reformer He Gives Us The Inside Story Of How The Framework For The Growth That Has Taken Place Subsequently Was Laid In That Time. From The Reforms That Were Initiated To The Politics That Threatened All Initiative, The Opposition From Within The Party As Also Outside It, Which Tried To Derail The Process, Sinha Pulls No Punches In This Candid Memoir. Nor Does He Shy Away From Discussing The Attempts To Cut Him Down To Size, Including The Proposal To Split Up The Ministry Of Finance, And The Various Controversies Of The Time From The Two Uti Scams To The Flex Industries Case And The Mauritius Tax Treaty Case (In Which He Was Alleged To Have Favoured His Daughter-In-Law), All Of Which He Faced With Equanimity And Strength Of Character. There Are, Besides, Piquant Observations On The Jostling For Position And Prime Postings That Any Minister Has To Face. In The Popular Eye, The Finance Minister Is Often Seen As A Taxing Machine, A Man Entrusted, As One British Chancellor Of The Exchequer Put It, With A Certain Amount Of Misery Which Is His Duty To Distribute As Fairly As He Can. This May Perhaps Be True, But, As This Memoir Shows, The Finance Minister Can Also Bestow A Few Pleasant Surprises.

This handbook gives a detailed explanation of the WHO/UNICEF guidelines for the integrated management of childhood illness (IMCI). The guidelines set out simple and effective methods for the prevention and management of the leading causes of serious illness and mortality in young children. They promote evidence-based assessment and treatment using a syndromic approach that supports the rational, effective and affordable use of drugs. The handbook gives an overview of the IMCI process and includes technical guidelines to assess and classify a sick young infant aged from one week up to two months, and a sick young child aged two months to five years; as well as guidance on how to identify treatment; communicate and counsel; and give follow-up care.

Semler turned his family's business, the aging Semco corporation of Brazil, into the most revolutionary business success story of our time. By eliminating uneeded layers of management and allowing employees unprecedented democracy in the workplace, he created a company that challenged the old ways and blazed a path to success in an uncertain economy.

With a new prologue ‘Splendid . . . anyone who wants to understand Indian politics or think they do should read it’ -Indian Express ‘Delightfully written . . . he has a sharp eye for details, especially the actions of political leaders’ - India Today ‘Captures the drama of 2014 and the men who powered it’-Open ‘Holds you to your seat, often on the edge . . . A procession of India’s colourful political characters—Lalu Yadav, Amit Shah, Rahul Gandhi, Narendra Modi and many more come intimately close through the author’s accounts’ -The Hindu ‘Candid and forthright . . . and deliciously indiscreet’ -Hindustan Times ‘A racy narrative that goes beyond recording immediate political history’ -Tehelka The 2014 Indian general elections has been regarded as the most important elections in Indian history since 1977. It saw the decimation of the ruling Congress party, a spectacular victory for the BJP and a new style of campaigning that broke every rule in the political game. But how and why? In his riveting book, Rajdeep Sardesai tracks the story of this pivotal election through all the key players and the big news stories. Beginning with 2012, when Narendra Modi won the state elections in Gujarat for a third time but set his sights on a bigger prize, to the scandals that crippled Manmohan Singh and UPA-II, and moving to the back-room strategies of Team Modi, the extraordinary missteps of Rahul Gandhi and the political dramas of election year, he draws a panoramic picture of the year that changed India.

Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women’s empowerment What Works in Girls’ Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls’ education.
