MEM202 First Mid-term Exam

Summer, 2004-05 Extra Credit In the dimensionally homogeneous equation:

$l M c A P \sigma = + \sigma$ is a stress, A is an area, M is a moment of a force and c is a length. Determine the dimensions of P and l (explain your answer). Solution

Note: SI Units $m^2 N$ Area Force $\sigma =$

$m^2 N A P = \hat{l} P = N m^2 N l M c = \hat{l} l$

$= m^4$ NAME: I.D.:

Statics - ksuweb.kennesaw.edu

To solve, you can use the method of joints or the method of sections.

Beams (bending members): Members are loaded with internal axial forces, shear forces, and moments. To solve, cut the member at the desired location, draw a new free-body diagram of the cut section, and write equilibrium equations.

This free online statics course teaches how to assess and solve 2D and 3D statically determinate problems. The course consists of 72 tutorials which cover the material of a typical statics course (mechanics I) at the university level or AP physics. In order to gain a comprehensive understanding of the subject, you should start at the top and work your way down the list.
