Using U and W on a CNC Lathe . On a CNC machining centre incremental and absolute are modal. That means when one is active it stays active until you programme the other. Now on a CNC Lathe it ' s different. You just change your axis to U or W. You can remember this by its position in the alphabet UVW correspond to XYZ.

Your CNC lathe ' s controller will be setup to start in either diameter or radius mode. In diameter mode, X-axis values specify diameters, while in radius mode, they specify a radius from the axis. As you would expect, diameter mode X-axis values are exactly twice what the radius mode values are, so it is important that you know which mode your lathe is using.
