Ford offered two versions of the 351 engine, a Windsor 351 and a Cleveland 351. The Windsor motor is considered a small block. The Cleveland 351 is between a small block and a big block. Even though the Cleveland 351 came from the small block family, few parts will interchange. The heads on the 351 4 barrel engine were very similar to the Boss ...

The 'Racing Boss 351' (not to be confused with the Ford 335 engine Cleveland-based Boss 351) is a crate engine from Ford Racing Performance Parts. The block was based on the 351 cu in (5,752 cc) Ford Windsor engine, but uses Cleveland sized 2.75 in (70 mm) main bearing journals. Deck height choices include 9.2 in (234 mm) and 9.5 in (241 mm).

**Ford small block engine—Wikipedia**

The Ford 351 Windsor was first introduced in 1969 and was quite a breakthrough in regards to the ways Ford produced its V8 engines. When Ford introduced the 302 to replace the 289 the engines were very similar and even used the same pistons.. The 351 Windsor was in a league of its own because of its heightened deck block, larger connecting rods and much "beefier" main bearing caps.

**Ford 351 Windsor V8 Engine Specs, Firing Order and**...

The Ford 351W was an engine developed by the Ford Motor Company. Many of the 351W engines were produced in the Ford factory located in Windsor, Canada. Ford began manufacturing the engines in 1969 and continued using the engine in Ford vehicles until 1995. The Ford 351W was used in a variety of vehicles, from the Mustang to the F350.

**Ford 351W Specs—It Still Runs**

The engine block, intake manifold and cylinder heads are made of cast iron, with the block, manifold and heads contributing to a total average engine weight of 510 lbs. The intake manifold on the 1969-76 351 Windsor is held to the cylinder heads with 16 bolts. Later performance versions sometimes used aluminum intake manifolds.
