"Global Health in the 21st century: The
Globalization of Disease and Wellness is
an outstanding, comprehensive,
multidisciplinary approach to global
health. This textbook provides an excellent
foundation for global health students from
which they can build new approaches to
improving health outcomes throughout the
world from a variety of perspectives."

(PDF) Global health in the 21st century -
ResearchGate

Globally, annual government expenditure on health varies from as little as US\$ 20 per person to well over US\$ 6000. For 5.6 billion people in low- and middle-income countries, more than half of all health care expenditure is through out-of-pocket payments. This is an extremely inefficient situation for health care.
