"Exciting and engaging vocabulary instruction can set students on the path to a lifelong fascination with words. This book provides a research-based framework and practical strategies for vocabulary development with children from the earliest grades through high school. The authors emphasize instruction that offers rich information about words and their uses and enhances students' language comprehension and production. Teachers are guided in selecting words for instruction; developing student-friendly explanations of

new words; creating meaningful learning activities; and getting students involved in thinking about, using, and noticing new words both within and outside the classroom. Many concrete examples, sample classroom dialogues, and exercises for teachers bring the material to life. Helpful appendices include suggestions for trade books that help children enlarge their vocabulary and/or have fun with different aspects of words"--

This volume is designed to prevent and correct most word-level reading difficulties. It trains phonemic awareness and promotes sight vocabulary acquisition, and therefore reading fluency.

In recent years, scientists have made great strides in understanding how children learn to read, but also in how to prevent and correct most reading difficulties. However, the American Federation for Teachers, the Journal of Learning Disabilities, and School Psychology Review, have all highlighted the fact that these scientific findings have not yet become widely known or used in our schools. Equipped for Reading Success is designed to summarize these research results in a clear and easy-to-read manner, bringing teachers up-to-date on these exciting findings. More than an explanation of current research, Equipped for Reading Success is a complete program for training phonemic awareness. Research has shown that contrary to our intuitions,

phonemic awareness is important for remembering the words we read (sight word recognition), not just for developing phonic decoding skills. Equipped for Reading Success uses a developmentally appropriate approach designed to boost phonemic awareness, phonics, and instant word recognition. Equipped for Reading Success also gives teachers concrete tools to help children develop a large sight vocabulary. In addition, it is designed to supplement any existing reading program or approach. Implementing the program requires minimal planning and only several minutes of instruction per day. With today's emphasis on Response to Intervention (RTI), Equipped for Reading Success provides the much needed "research-based" content to

make your RTI efforts successful. Equipped for Reading Success is 1) preventive in kindergarten and first grade, 2) provides remedial help for struggling readers, and 3) can accelerate the progress of students with learning disabilities, thus providing interventions for all three tiers of RTI.
