Faith, family, hard work, and second chances are at the core of every great American story, and Jenny Doan's story is just that. In her new memoir, How to Stitch an American Dream, readers will discover the behind-the-scenes success story of the Missouri Star Quilt Company and Jenny's remarkable journey to overcome hardship, claim the abundance of family, and ignite the power of giving--all while revitalizing a small town along the way. Over the last decade, the Doan family business, the Missouri Star Quilt Company in tiny Hamilton, Missouri, has grown from Jenny's corner shop--with one quilting machine and two bolts of fabric for sale in the back--to become the largest supplier of pre-cut quilting fabric in the headquarters of Jenny's world-famous YouTube tutorial videos. Jenny is now giving her fans, the business world, and moms of all ages (and grandmas too!) what they've been asking for: the full story of her journey, from her humble beginnings as a homeschooling mom, to founding MSQC in her fifties, through the remarkable success and inspiration she's so well-known for today. In this book, you'll learn: How she and her beloved husband, Ron, raised seven children on a shoestring budget-- and had fun doing it; How, after a string of bad luck, the family made a prayer-based decision to leave California behind and start over again in rural Missouri, even though they had no place to live, no jobs lined up, and no idea how they were going to make it; How Jenny, Ron and their children worked side-by-side to patch together a family home out of a crumbling shell of a farmhouse; And how their faith, hard work, and generosity not only carried them through the hard times, but led directly to the success of the Missouri Star Quilt Company. How to Stitch an American Dream will make you laugh, cry, say "Bless your heart."

Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. "Dr. Phil," along with George Iny and the Editors of the Automobile Protection Association, pull no punches.

From the witty senior editor of Jalopnik, Gizmodo Media's acclaimed website devoted to cars, technology, and more, comes a revealing, savvy, and humorous look at self-driving cars. Self-driving cars sound fantastical and futuristic and yet they'll soon be on every street in America. Whether it's Tesla's Autopilot, Google's Waymo, Mercedes's Distronic, or Uber's 24,000 modified Volvos, companies across industries and throughout the world are developing autonomous cars. Even Apple, not to be outdone, is rumored to be creating its own technology too. In Robot, Take the Wheel, Jason Torchinsky explores the state of the automotive industry. Through wit and wisdom, he explains why autonomous cars are being made and what the future of automated cars is. Torchinsky encourages us to consider autonomous cars as an entirely new machine, something beyond cars as we understand them today. He considers how we'll get along with these robots that will take over our cars' jobs, what they will look like, what sorts of jobs they may do, what we can expect of them, how they should act, ethically, how we can have fun with them, and how we can make sure there's still a place for those of us who love to drive with manual or automatic transmission. This unique and highly readable volume is brimming with industry insider information and destined to be a conversation starter. It's a must-have for car lovers, technology geeks, and everyone who wants to know what's on the road ahead.

Matt Keegan interviews artists and commissions writing to reassess the 1990s as the moment when the Democratic Party abandoned its New Deal values and swung to the right In the wake of the Trump election, artist Matt Keegan (born 1976) began investigating the Democratic Party's shifts over recent decades. In the late '80s, members of the Democratic Leadership Council successfully moved the party's platform to the right by including a pro-business, pro-military, interventionist agenda, and downplaying social infrastructure as a calculated break from its New Deal-era foundation. This shift led to Bill Clinton's consecutive terms. 1996 captures this pivotal time in American politics and society through the experience of artists who completed their undergraduate studies in that year and voted for Clinton, and others who were born in 1996 and voted for the first time in 2016. Essays focus on cultural and ideological shifts from that time, such as the 1994 Crime Bill, 1996 Immigration Act, the Telecommunications Act, the start of Fox News and beyond.

The A-904 and A-727, debuting in 1960 and 1962, respectively, are 3-speed automatic Chrysler TorqueFlite Transmissions. In Mopar circles, they have become synonymous with strength, durability, and performance. In fact, 43 years after its first application, A-904s were still found in the Jeep lineup! TorqueFlites are known for their dependability, but many have endured a tremendous amount of abuse over 50-plus years when hooked up to V-8 Mopar powerplants. There is little doubt that some of these automatics could be prone to failure, or at least need a thorough rebuild. Tom Hand shares his decades of experience rebuilding TorqueFlite transmissions with chapters dedicated to troubleshooting, disassembly and reassembly, performance modifications, post-installation procedures, and the most thorough source guide offered in print, ever. The author walks you through the TorqueFlite rebuild with color photos showcasing step-by-step procedures with highly detailed, easy-to-follow text. This book will keep money in your pocket and add experience to your r\u00e9sum\u00e9, but more important, it will help you get your Mopar back on the road! p.pi (margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial)
