Island

Island, any area of land smaller than a continent and entirely surrounded by water. Islands may occur in oceans, seas, lakes, or rivers. A group of islands is called an archipelago. island in Lake Ann, Washington

island | Definition, Types, Examples, & Facts | Britannica

An island or isle is any piece of subcontinental land that is surrounded by water. Very small islands such as emergent land features on atolls can be called islets, skerries, cays or keys. An island in a river or a lake island may be called an eyot or ait, and a small island off the coast may be called a holm. Sedimentary islands in the Ganges delta are called chars.

Island - Wikipedia

The words island and isle are etymologically distinct. Island can be traced back to Old English gland, composed of two elements g and land. Land, as we might expect means "land," but g means "island" in Old English. In a sense, then, gland is "island-land."

Island | Definition of Island by Merriam-Webster

noun a tract of land completely surrounded by water, and not large enough to be called a continent. something resembling an island, especially in being isolated or having little or no direct communication with others.

Island | Definition of Island at Dictionary.com

The island is composed primarily of basalt, a low-silica lava associated with effusive volcanism as has occurred also in Hawaii. Iceland, however, has a variety of volcanic types (composite and fissure), many producing more evolved lavas such as rhyolite and andesite. Iceland has hundreds of volcanoes with about 30 active volcanic systems.
