Steers buyers through the the confusion and anxiety of new and used vehicle purchases like no other car-and-truck book on the market. "Dr. Phil," along with George Iny and the Editors of the Automobile Protection Association, pull no punches.

"Dr. Phil," Canada's best-known automotive expert, invites another driver to come aboard. After forty-six years and almost two million copies sold, Phil Edmonston is joined by a co-pilot for the Lemon-Aid Guide - George Iny, along with the editors of the Automobile Protection Association. The 2017 Lemon-Aid has everything: an encyclopedic lineup of the best and worst cars, trucks, and SUVs sold since 2007; secret warranties and tips on the "art of complaining" to help you get your money back; and new-car buying tips that will save you tons of money by revealing the inflated cost of fancy and frivolous add-ons. Lemon-Aid is an essential guide for careful buyers and long-time gear-heads who don't know as much

as they think.

Lemon-Aid New and Used Cars and Trucks 1990-2015 steers the confused and anxious buyer through the purchase of new and used vehicles unlike any other car-and-truck book on the market. "Dr. Phil," Canada's best-known automotive expert for more than 42 years, pulls no punches.

This compendium of everything that's new in cars and trucks is packed with feedback from Canadian drivers, insider tips, internal service bulletins, and confidential memos to help the consumer select what's safe, reliable, and fuel-frugal.

Food Fraud: A Global Threat With Public Health and Economic Consequences serves as a practical resource on the topic of food fraud prevention and compliance with regulatory and industry standards. It includes a brief overview of the history of food fraud, current challenges, and vulnerabilities faced by the food industry, and requirements for compliance with regulatory and industry standards on mitigating vulnerability to food fraud, with a focus on the Global Food Safety Initiative (GFSI) Benchmarking Requirements. The book also provides individual chapters dedicated to specific commodities or sectors of the food industry known to be affected by fraud, with a focus on specific vulnerabilities to fraud, the main types of fraud committed, analytical methods for detection, and strategies for mitigation. The book

provides an overview of food fraud mitigation strategies applicable to the food industry and guidance on how to start the process of mitigating the vulnerability to food fraud. The intended audience for this book includes food industry members, food safety and quality assurance practitioners, food science researchers and professors, students, and members of regulatory agencies. Presents industry and regulatory standards for mitigating vulnerability to food fraud including Global Food Safety Initiative (GFSI) Benchmarking Requirements Provides tools and resources to comply with industry and regulatory standards, including steps for developing a food fraud vulnerability assessment and mitigation plan Contains detailed, commodity-specific information on the major targets of food fraud, including specific vulnerabilities to fraud, analytical methods, and strategies for mitigation

Introducing a NEW addition to our growing library of computer science titles, Algorithm Design and Applications, by Michael T. Goodrich & Roberto Tamassia! Algorithms is a course required for all computer science majors, with a strong focus on theoretical topics. Students enter the course after gaining hands-on experience with computers, and are expected to learn how algorithms can be applied to a variety of contexts. This new book integrates application with theory. Goodrich & Tamassia believe that the best way to teach algorithmic topics is to present them in a context that is motivated from applications to uses in society, computer games, computing industry, science, engineering, and the internet. The text teaches students about designing and using algorithms, illustrating connections between topics being taught and their potential applications, increasing engagement.
