When thieves find an abandoned child lying in a monster ' s footprint, they have no idea that their wilderness discovery will change the course of history. Cloaked in mystery, Auralia grows up among criminals outside the walls of House Abascar, where vicious beastmen lurk in shadow. There, she discovers an unsettling--and forbidden--talent for crafting colors that enchant all who behold them, including Abascar ' s hard-hearted king, an exiled wizard, and a prince who keeps dangerous secrets. When Auralia ' s gift opens doors from the palace to the dungeons, she sets the stage for violent and miraculous change in the great houses of the Expanse. Auralia ' s Colors weaves literary fantasy together with poetic prose, a suspenseful plot, adrenaline-rush action, and unpredictable characters sure to enthrall ambitious imaginations.

This paper addresses the issue of threshold effects between public debt and economic growth in the Caribbean. The main finding is that there exists a threshold debt to gross domestic product (GDP) ratio of 55–56 percent. Moreover, the debt dynamics begin changing well before this threshold is reached. Specifically, at debt levels lower than 30 percent of GDP, increases in the debt-to-GDP ratio are associated with faster economic growth. However, as debt rises beyond 30 percent, the effects on economic growth diminishes rapidly and at debt levels reaching 55-56 percent of GDP, the growth impacts switch from positive to negative. Thus, beyond this threshold, debt becomes a drag on growth.
