Clarivate Analytics and will receive their impact factor in due course. For any journal to have an...

Impact factors for journals : Nature Support

Nature 's impact factor, a measure of how many citations a journal generates in other works, was 38.138
in 2015 (as measured by Thomson ISI). However, as with many journals, most papers receive far fewer
citations than the impact factor would indicate. Nature's journal impact factor carries a long tail.

selected articles in that journal within the last few years.

Find Impact Factor of Journal Online | Impact Factor ...

Journal impact factors are influenced heavily by a small number of highly cited papers. In general, most papers published in 2013–14 received many fewer citations than indicated by the impact factor. Two journals (Nature [blue], PLOS ONE [orange]) are shown to represent a highly cited and less cited journal, respectively.

Impact factor - Wikipedia

The annual JCR impact factor is a ratio between citations and recent citable items published. Thus, the impact factor of a journal is calculated by dividing the number of current year citations to the source items published in that journal during the previous two years (see Figure 1).

The Clarivate Analytics Impact Factor - Web of Science Group

The impact factor is based on a two-year citation window, which makes it ill-suited across all disciplines, as it covers only a small fraction of citations received over time, Larivière and Sugimoto note in their analysis.
