1300 Series The 1300 Series offers a range of in-line 6-cylinder turbocharged and turbo after-cooled 7.6-litre and 8.7-litre engines, whose power ranges from 145.5 kW to 246 kW. This series creates little noise and produces a low level of gas emissions (NOx, HC, CO).

1300 Series - Perkins QM
The driver of a car controls the engine's power to achieve vehicle speed. The operator of an off-highway diesel engine just controls engine speed, and power is developed automatically. This behaviour is similar to the cruise control in a car. Diesel engines are described as lean burn engines: they require more air than fuel.

Providing filtration protection to remove particulates and give the best protection for your Perkins engine. Normal practice is to change the safety element every 3rd time the main filter is recommended. You can't control the environment you're working in, but you can keep your engine working longer by keeping the air used for combustion clean.
