liquid. In general, the same pigments are employed in oil- and water-based paints, printing inks, and plastics.

Pigments may be organic (i.e., contain carbon) or inorganic.

Pigment | chemistry | Britannica

Pigments are often derived from minerals, but they can also be made synthetically. Pigments are used in paints, inks, plastics, fabrics, cosmetics, and food, to name a few examples. They are often better than dyes at keeping their color for many centuries and for withstanding high heat, intense light, and exposure to weather or chemical agents.
