Light, Refraction and Lenses Name: Direction of Bending page 4.10 in workbook Read from Lesson 1 of the Refraction and Lenses chapter at The Physics Classroom: MOP Connection: Refraction and Lenses: sublevels 2 and 3 1. The optical density is the property of a medium that provides a relative measure of the speed at which light travels in that medium. Light travels slowest (fastest, slowest) in ...

*Direction of Bending.docx - Light Refraction and Lenses ...*
refraction. Light rays change direction when they reflect off a surface, move from one transparent medium into another, or travel through a medium whose composition is continuously changing. The law of reflection states that, on reflection from a smooth surface, the angle of the reflected ray is equal to the angle of the incident ray.

*Light - Reflection and refraction ¦ Britannica*
Complete the paragraph, in the workbook page 55, exercise 6, to describe the Law of reflection. 2. Identify the relationship between the angle of incidence and the angle of reflection, in the workbook page 56 , exercise 7.
