The Magnesium Solution For High Blood Pressure By Jay S ...

Hypermagnesemia is an electrolyte disorder in which there is a high level of magnesium in the blood. Symptoms include weakness, confusion, decreased breathing rate, and decreased reflexes. Complications may include low blood pressure and cardiac arrest. It is typically caused by kidney failure or is treatment-induced such as from antacids that contain magnesium. Less common causes include tumor lysis syndrome, seizures, and prolonged ischemia. Diagnosis is based on a blood level of magnesium gre

Hypermagnesemia - Wikipedia

Magnesium is a key player in the normal functioning of nerves, muscles, blood vessels, bone, and the heart. So when you take magnesium, you not only help your blood pressure, but also help every cell and system in your body.
