Overview. This magisterial survey of the historical geography of the West Indies is at bottom concerned with the causes and consequences of three complex and inter-related phenomena: the rapid and total removal of a large aboriginal population; the development of plantation agriculture and the arrival of enforced labour, in the form of many thousands of African slaves; and the environmental, ecological and cultural changes that resulted.

West Indies - West Indies - Colonialism: England was the most successful of the northwestern European predators on the Spanish possessions. In 1623 the English occupied part of Saint Christopher (Saint Kitts), and in 1625 they occupied Barbados. By 1655, when Jamaica was captured from a small Spanish garrison, English colonies had been established in Nevis, Antigua, and Montserrat.
