The first volume focusing on film music as a worldwide phenomenon

On March 1, 1954, the US military detonated "Castle Bravo," its most powerful nuclear bomb, at Bikini Atoll in the Marshall Islands. Two days later, the US military evacuated the Marshallese to a nearby atoll where they became part of a classified study, without their consent, on the effects of radiation on humans. In *Radiation Sounds* Jessica A. Schwartz examines the seventy-five years of Marshallese music developed in response to US nuclear militarism on their homeland. Schwartz shows how Marshallese singing draws on religious, cultural, and political practices to make heard the deleterious effects of US nuclear violence. Schwartz also points to the literal silencing of Marshallese voices and throats compromised by radiation as well as the United States' silencing of information about the human radiation study. By foregrounding the centrality of the aural and sensorial in understanding nuclear testing's long-term effects, Schwartz offers new modes of understanding the relationships between the voice, sound, militarism, indigeneity, and geopolitics.

Musical Minorities is the first English-language monograph on the performing arts of an ethnic minority in Vietnam. Living primarily in the northern mountains, the Hmong have strategically maintained their cultural distance from foreign invaders and encroaching state agencies for almost two centuries. They use cultural heritage as a means of maintaining a resilient community identity, one which is malleable to their everyday needs and to negotiations among themselves and with others in the vicinity. Case studies of revolutionary songs, countercultural rock, traditional vocal and

instrumental styles, tourist shows, animist and Christian rituals, and light pop from the diaspora illustrate the diversity of their creative outputs. This groundbreaking study reveals how performing arts shape understandings of ethnicity and nationality in contemporary Vietnam. Based on three years of fieldwork, Lonán Ó Briain traces the circulation of organized sounds that contribute to the adaptive capacities of this diverse social group. In an original investigation of the sonic materialization of social identity, the book outlines the full multiplicity of Hmong music-making through a fascinating account of music, minorities, and the state in a post-socialist context.
